DETAILED ACTION

Allowable Subject Matter

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 1.

Specifically regarding claim 1, wherein Takenaka (US20030142253) teaches the state of the art of a semi-transparent reflective electro-optic apparatus, comprising: an electro-optic material; a light-transmitting substrate retaining the electro-optic material; a light-transmitting concave and convex forming film defining specific concave portions and convex portions; and a light-reflecting film formed over the concave and convex forming film, the light-reflecting film defining a light-transmitting window, a back surface of the light-reflecting film including.

But, Takenaka (US20030142253) fails to explicitly teach in a partial region of a periphery of the light-transmitting window, a light-guiding reflection surface that opposes a surface of the light-reflecting film in a region opposing the partial region with the light-transmitting window in between, so that part of light incident from a back surface side of the light-transmitting substrate is reflected on the light-guiding reflection surface and guided to a surface side of the light-transmitting substrate.
